-OR-

Visit our office and have a sales specialist assist you in the design and configuration of your new case. Please be sure to read our on-site firearms policy below before visiting our facility!

For the safety and security of our customers and employees, the following Cases2Go On-Site Firearms Policy must be adhered to:

Cases2Go is committed to maintaining a safe and secure environment for customers and employees. This policy is a proactive step towards reducing the risk of injury or death associated with intentional or accidental use of weapons.

1. Please call ahead to schedule an appointment with a sales specialist.
2. Absolutely **NO LOADED FIREARMS** or concealed weapons will be permitted inside the building.
3. **ALL FIREARMS** must be secured with plastic tie wraps and free of any magazines before entering the facility. If you need tie wraps, they will be provided for you.
4. If magazines are to be measured, please ensure they are empty before arriving at our facility.
5. Cases2Go reserves the right to refuse service, when in our sole opinion – the safety of our customers or employees has been compromised.

Thank you for your cooperation and understanding.

The following information will greatly aid you in ordering your new Custom Weapons Case. If you provide us with the tracing and measurements requested, this will provide enhanced service and accuracy, which will keep your weapon looking great in your new case.

Please review the tracing instructions below carefully.

If you have any questions, please don't hesitate to contact us for assistance.

Step 1: Select the Case Model that will best accommodate your requirements. (See below for assistance)

Case Model	Cushion Dimensions
	Length x Width x (Body + Lid Depth)
RHD-S-2100	13.0 x 9.2 x (4 + 2)"
RHD-S-2400	18.0 x 13.0 x (4.7 + 2)"
RHD-S-2720	22.0 x 17.0 x (8 + 2)"
RHD-S-3100*	36.5 x 14.0 x (4 + 2)"
RHD-S-3200*	44.0 x 14.0 x (4 + 2)"
RHD-S-3300*	50.5 x 14.0 x (4 + 2)"

*Cases feature wheels and retractable handle.

Step 2: Place the template paper on a flat, level surface. Using a straight edge and ruler, mark a perimeter according to the cushion dimensions for the case model chosen, or trace around existing foam cushion if available.

Step 3: Configure the placement of your materials. Remember to fit your items within the space allowed for the case size selected. Refer to Fig. A. Make the majority of the weapon level by adding blocking underneath.

(NOTE: Please allow a 1" minimum border around the interior edge of the cushion and your items. This will allow for proper shock absorption to keep your weapon and case in optimum condition.)

Step 4: With a pencil, trace the exact outline of your items. Be sure to keep the pencil straight up and down so as not to distort the actual shape of the item.

(NOTE: The foam cavities will be cut according to the tracing provided. Please be sure to keep your pencil straight up and down to allow conformity of shape. Small or tight areas will be blended into larger cavity. We cannot not be held responsible for mis-traced items.)

Please also note the placement of any additional accessory compartments desired. Refer to Fig. B.

Step 5: To ensure the weapon will sit level in the case, foam blocking will be added beneath the weapon in areas in which you have blocked.

Again, ensuring the weapon is level, measure the distance from the tabletop to the highest point and note this as the "Overall Depth" on your drawing.

Then measure from the table top to the BOTTOM of the weapon at each point where blocking has been placed to level the weapon. Divide the tracing into sections and mark depths accordingly. See Fig C.

This will allow us to determine the depth of the cavities, which is important to ensure the items are securely fitted within the case.

Step 6: Mail to:

24650 State Road 54
Lutz, FL 33559

Please be sure to include your name, Reference your full name, return address and telephone. Our sales specialist will contact you regarding the details of your order.
