

# Anvil Cases ATA Case

## *A Custom Fit You Can Count On*

Anvil ATA cases offer the ultimate in protection. Designed to meet or exceed the Air Transportation Association Specifications 300, Category 1, ATA cases are the most durable reusable transit cases available.

Constructed to perform under the most exacting conditions, Anvil ATA cases provide unsurpassed function and reliability. Exterior panels are built with strong, solid components, and interiors are custom-designed with precision-sculpted unicellular foam to provide maximum shock absorption and safety from damage due to vibration. The result is uncompromising fit and maximum protection.

The

Anvil ATA case is unparalleled in the industry. Using precision fabrication techniques combined with rugged, long-lasting components, each case is constructed to provide maximum protection.

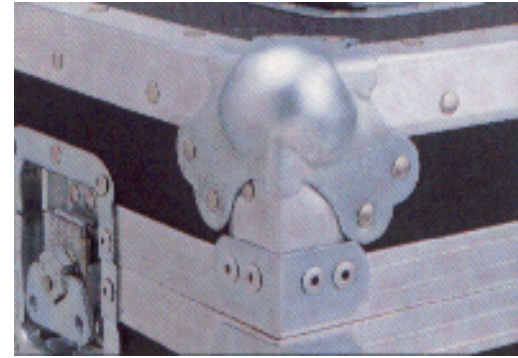

Exterior panels utilize ACX plywood, supported by an outer frame of strong, lightweight aluminum edging secured by machine-driven split steel rivets. ABS plastic, fiberglass and aluminum provide damage-resistant exterior surfaces. Plastic and fiberglass are available in a variety of colors. Soft,

resilient unicellular foam is sculptured around each piece of equipment to create a secure and complete fit. Anvil ATA cases comply with the Air Transportation Association Specification 300, Category 1 and are available for virtually all transportable products.
