

Anvil Cases ATA Shipping Case Military Application Cases

Designed to Meet Military Demand

Anvil Cases ATA M.A.C.C. cases are the most durable reusable transit cases in the world. M.A.C.C. cases are designed to meet MIL STD 810 C, D, E and exceed the Air Transportation Association Specification 300, Category 1.

Constructed to perform in the most demanding conditions, Anvil M.A.C.C. cases provide unsurpassed function as well as rugged

durability. Exterior panels are built with strong, solid components; and interiors are custom-designed with precision-sculpted unicellular foam to provide maximum shock absorption and protection from damage due to vibration. The result is uncompromising fit and maximum protection.

Anvil Cases ATA M.A.C.C. cases conform to the high standards of the U.S. Military by meeting the most stringent case requirements, and by providing you with strength and reliability you can count on. All M.A.C.C. cases are constructed with black matte hardware, non-reflective surfaces, water seals and gaskets, and come in standard olive drab (other colors available).

Anvil Cases M.A.C.C. cases are unsurpassed in the industry. Precision manufacturing techniques and carefully selected materials ensure that each M.A.C.C. case is constructed to meet U.S. Military requirements.

Exterior panels utilize ACX plywood, supported by an outer frame of strong, lightweight aluminum borders that are secured by machine-driven split steel rivets. ABS plastic or fiberglass with matte black hardware provide long-lasting, non-reflective exterior surfaces for all Anvil M.A.C.C. cases. Soft, resilient unicellular foam is sculptured around each piece of equipment, creating a secure and complete fit.

Anvil Cases ATA M.A.C.C. Construction Features

1/4", 3/8" 1/2" ACX plywood	Matte black tongue-in-groove valance
