

# Anvil Cases Modular Interlocking Case System

**Create Your Own Free-Standing Work Station in Seconds**

Anvil Cases Modular Interlocking Case System (M.I.C.S.) is a unique patented system for case lid attachment. Almost any application can be created with a few easy assembly procedures to turn clamp-on-lid design cases into field workstations.

Case lids, which secure to the case side with an attachment catch, feature folding legs which are used to create a self-contained workstation. Lids may also be transformed into freestanding tables. The M.I.C.S. option is available on most Anvil A.T.A. cases.

**(Note: Some size & height limitations. Check with a Root International case design specialist.)**
